QUESTION

The circumference of the base of a cylindrical vessel is 132 cm and its height is 25 cm. Find the

- 1) radius of the cylinder
- 2) volume of cylinder.(use $\pi = \frac{22}{7}$)

SOLUTION

Let r and h be the radius of the base and height of the cylindrical vessel, respectively.

Let C_{base} be its base circumference and V be its volume.

We know that,

$$C_{base} = 2\pi r \quad (1)$$

$$V = \pi r^2 h \quad (2)$$

1. Radius of the cylinder

$$C_{base} = 2\pi r \quad 132 = 2\pi r \quad 132 = 2 \times \frac{22}{7} \times r$$

$$r = 21$$

Thus the radius of base of the cylindrical vessel is 21 cm.

2. Volume of the cylinder

$$V = \pi r^2 h \quad V = \frac{22}{7} \times 21^2 \times 25 \quad V = 34650$$

Thus, the volume of the cylindrical vessel is 34650 cm^3 .

Base of the cylindrical vessel with radius 21 cm
